

單字轉換 (Word-Transformation)

- **Input**

在輸入檔之中，第一行裡面有一個整數G，它代表著總共有G種單字轉換規則($1 < G < 20$)，在輸入檔之中，從第2行到第G+1行，為所有的單字轉換規則，每一行的單字轉換規則，包含兩個單字在內，第一個的單字是轉換前的樣子，第二個單字是轉換後的樣子。

緊接著單字轉換規則之後的那一行，包含一個整數N($1 < N < 5$)，代表接下來有N行需要被轉換的文字。

- **Output**

根據單字轉換規則，把文章裡的單字轉換成相對應的單字，著輸出轉換之後的文字，結果輸出格式請看Sample Output。

- **Sample Input**

```
8
em them
cuz because
gratz grateful
nah no
pos supposed
sez said
tank thanks
Wuz was
2
nah i sez tanx cuz i wuz pos to
not cuz i wuz gratz
```

- **Sample Output**

```
no I said thanks because I was supposed to
not because I was grateful
```

- 下面的是另外一種測試資料

- **Sample Input**

7

o of

It list

lets letters

up upper

sez said

alpha alphabetical

cuz because

3

The It o lets should be an alpha It o

up case lets followed

by an alpha It o lower case lets

- **Sample Output**

The list of letters should be an alphabetical list of

upper case letters followed

by an alphabetical list of lower case letters
